

# SPACE ZOT

We are proud to present the result of our work on ATARI STE (Blitter is highly stressed, 1Mb needed)

Space Zot is an arcade game in the tradition of the great video games of the early '80s: wave after wave of frantic action, with the sole aim of achieving a top score in order to get your name in the top ten.

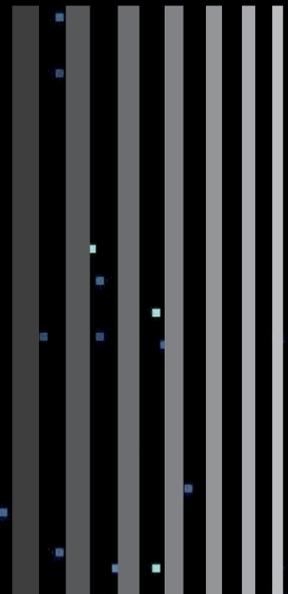

Space Zot is an action game!

But we've worked hard on the scenario to give players a motivation worthy of the challenge.

Are you up to the challenge?

We've integrated an innovative feature into Space Zot that allows you to save your best scores, motivating you to outdo yourself with each new game!

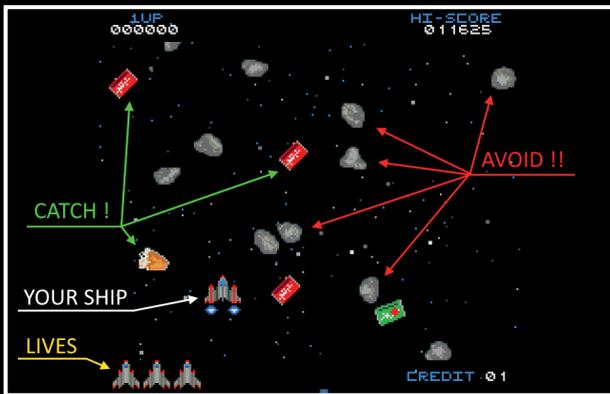

You can't afford to stagnate! Take charge and give it your all!

For the best gaming experience, we recommend using the best controller ever, the Atari 2600 controller.

Press any key to add credits and the fire button to begin an unforgettable journey through the Caisel asteroid belt.

Press Esc to quit the game.

Here's some information to help you cope with the complexity and difficulty of Space Zot.

There are several types of bonus:

1. beverages, which earn more or less points - beers are the best!

Collecting the same drink several times in succession multiplies the points obtained.

2. Z, O and T tokens, which give you an extra life when you manage to form the word ZOT.

3. NostroZot crew members, rare but highly profitable.

The game is made up of different stages, where you'll find more and more asteroids, and their speed will also increase.

In the first two stages, their trajectories are purely vertical.

From the third, a horizontal component is added to increase the difficulty.

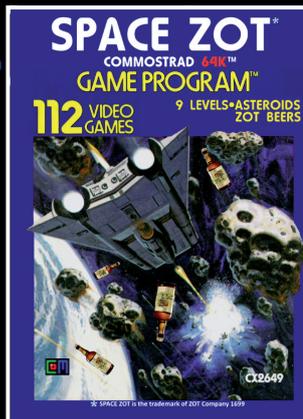

Originally, SpaceZot is a mini game that can be found in the Cosmos Chronicles game developed by my friend Dr Floyd, who is also behind SUPA ZAZAI DA! and CRASH TIME PLUMBER.

During a slow period of work on our game Catacombs, I started to create a more accomplished version. PAPY CPC and DMA-SC thought it was a great idea and supported me during development. Their graphics and music are incredible.

Available soon in your favorite store.  
Stay tuned !

Alcohol abuse is dangerous for your health, and can lead to memory loss and, worse still, to... , uh ,... ,memory loss !
